

November 16, 1987

TO: File  
FROM: Frank Filas, Engineer   
RE: Payday Claims, DOE/019/031

On November 13, 1987 Clive Stewart called me and asked what he would have to do to install an amalgamation circuit at the mine site. I told him that the Department of Health would probably require him to discharge the process water into a synthetically lined pond. He said that he would check with the Department of Health office in Moab for the necessary permit.
